## Requirements Toolkit4TFS

Modern Requirements is proud to announce the beta launch of Requirements Toolkit4TFS, a web based solution that easily provides baselining as well as the comparison between older and later versions of work items.

### What does Requirements Toolkit4TFS offer?

Requirements Toolkit4TFS offers the following benefits:

- A stable reference for future work
- Assessable progress on a live project
- Ability to compare and pinpoint the change in work items
- Helps taking on time decisions

es

### Inviting Beta testers.

Modern Requirements would like to invite beta testers for our latest product, Requirements Toolkit4TFS. You can apply for testing by sending us a mail at [info@smartoffice4tfs.com](mailto:info@smartoffice4tfs.com) or by calling our toll free number at 1-877-473-2881.

## New Learning Material Available

Modern Requirements has recently made available the latest learning and training materials for all of its products on their website.

You can now view demo videos, step by step videos, step by step guides and quick training demos at our website at - <http://modernrequirements.com/get-started>

For more information about our products and how to get optimum support and help, please send us an email at [info@edevtech.com](mailto:info@edevtech.com) or call us on our toll free number 1-877-473-2881.

## New versions release for SmartWord4TFS and SmartVisio4TFS

Modern Requirements recently released new versions of SmartWord4TFS and SmartVisio4TFS.

New features have been added to both while also fixing technical and performance issues from past versions.

### SmartWord4TFS v.3.1.0.4 & SmartVisio4TFS v.2.6.3.2

- Check box on get work item at current cursor position
- Smart parts don't get obsolete after process template update
- User will not be forced to include mandatory fields to be added in wizard
- Smart part should be included in doc file to make it still available after sharing
- Any missing Visual Studio info will be displayed in About dialogue box
- Get Work item panel should reset the check boxes selected after the work item get operation is completed

There were also some performance, technical and code issues that were resolved in these versions of SmartWord4TFS and SmartVisio4TFS.

## Modern Requirements in top 100 Microsoft Solution Providers

Modern Requirements (formerly eDevTECH) was listed as the one of the top 100 Microsoft Solution Providers in the July edition of the CIO Review magazine.

A distinguished panel of CEO's, CIO's, VC's, industry analysts and the editorial board of CIO review selected the 100 companies that are at the forefront of tackling today's challenge in the Microsoft ecosystem.

Modern Requirements is also the only Microsoft Visual Studio Partner to build its requirements tools on top of TFS.
