MODERN REQUIREMENTS

MSDN Webinar Invitation

MS Office is the most common requirements management tool used today. In this session we'll preview how SmartOffice4TFS provides a platform for all stakeholders to participate in the ALM process using Microsoft Word, Excel, Visio and Outlook.

We will also demonstrate the newly released Requirements Toolkit4TFS by creating multiple baselines, generating a difference report, visualizing a work item timeline and restoring (rollback) a work item baseline to the current state.

Please register using this link:

ModernRequirements.com

eDev Tech has merged both of its websites, smartoffice4tfs.com and edevtech.com and brings to you ModernRequirements.com.

We have maintained many resources from our old websites and have improved upon the site's:

- Product Information
- Product Demonstration videos
- Learning and Getting Started resources
- Search Capabilities
- Company and partner information

Visit us today at: **www.modernrequirements.com**

New SmartWord4TFS and SmartOutlook4TFS versions released

Modern Requirements has released new versions of SmartWord4TFS and SmartOutlook4TFS with bug fixes and new features like:

- Support drag and drop work item in backlog
- Support backlog designer feature
- Support import/export of backlog config files
- Fetch current state of the work item

To download the new versions, please click **here.**

Getting Started with Modern Requirements

You can now take advantage of our detail oriented training and demo section, Getting Started, on our new website, modernrequirements.com.

Get started with product demos, step by steps and guides to learn and improve your inteGREAT and SmartOffice4TFS experience. We will soon be launching our demos and training videos for Requirements Toolkit4TFS, our newest baselining tool.

Modern Requirements awarded as one of the top 100 Microsoft Solution Providers by CIO Review.

Modern Requirements (formerly eDevTECH) was listed as the one of the top 100 Microsoft Solution Providers in the July edition of the CIO Review magazine.

A distinguished panel of CEO's, CIO's, VC's, industry analysts and the editorial board of CIO review selected the 100 companies that are at the forefront of tackling today's challenge in the Microsoft ecosystem.

Modern Requirements is also the only Microsoft Visual Studio Partner to build its requirements tools on top of TFS.
